Cairo, Egypt (UTC+2/+3) | Open to remote roles | Available for EU and US overlap hours

SUMMARY

Frontend Engineer with **5 years** building for the web, **3+** of production experience in React, Next.js, and TypeScript. Led the incremental migration of a multi-tenant e-commerce platform (**70+ storefronts, 10,000+ monthly active users**) from Vue.js in Laravel Blade to React/Next.js with zero downtime, and rebuilt its marketing site as a statically generated Next.js app. Started as a data analyst before moving into frontend engineering, which shows in how I approach performance and UX work. Experienced working asynchronously with distributed teams and owning features end to end; looking for a remote role where product quality and performance matter.

PROFESSIONAL EXPERIENCE

NTG Clarity (Markatty)

Frontend Engineer

Giza, Egypt
May 2023 – Present

- Led the incremental migration of a multi-tenant e-commerce platform (**70+ live storefronts, 10,000+ monthly active users**) from **Vue.js inside Laravel Blade** to **React / Next.js**, converting **3 applications** (customer storefront, merchant admin dashboard, super-admin console) project by project with zero downtime over 9 months on a frontend team of 4.
- Designed the storefront theme system: **15+ reusable themes** on a shared component foundation, powering 70+ merchant storefronts through per-tenant configuration rather than per-store code forks.
- Rebuilt the marketing site markatty.com from **WordPress** to a statically generated **Next.js** site.
- Delivered 10+ bespoke statically generated Next.js sites for enterprise customers on the shared component foundation.
- Kept the legacy Vue-in-Blade admin stable during the transition while migrating themes and layouts to React, retiring each jQuery module as its screen moved.
- Shipped full-stack features end to end, extending **Laravel** APIs and integrating them with the React frontends; set up **Gitlab Actions** CI/CD pipelines for our projects.

Envaglo

Frontend Engineer (Part-time contract)

Remote
Jun 2025 – Oct 2025

- Architected a management dashboard from scratch with **Next.js App Router**, TypeScript, React Query, Tailwind CSS, and shadcn/ui.
- Designed the global state layer with **Zustand** and restructured component boundaries to eliminate re-renders on data-heavy views.
- Built multi-step data-entry modules with **React Hook Form** and **Zod**, enforcing schema validation on business-critical workflows.
- Cut time-to-interactive on the heaviest routes with **Server Actions** and streaming.
- Mentored a junior frontend developer through pull-request reviews and architecture decisions, working fully asynchronously.

Dealtio

Frontend Developer

Cairo, Egypt
Jun 2021 – Jun 2022

- Built responsive marketing sites and internal dashboards with JavaScript (ES6+), Bootstrap, and Laravel Blade.
- Implemented full CRUD workflows against REST APIs for internal operations tools.

Product Manager

Jan 2021 – Jun 2021

- Worked with B2B clients and the development team to define requirements and prioritise product features.

Data Analyst

Jan 2020 – Jan 2021

- Built reporting dashboards and ad-hoc analyses in SQL and Python for leadership and the marketing team.

SELECTED PROJECTS

Caffeina

Next.js, Sass, Framer Motion

- Statically generated storefront with image optimization, lazy loading, and route-based code splitting.

HH Shaker

Laravel — Blade

- Developed a corporate website with dynamic company profiles, a filterable product catalog, and interactive contact forms.
- Applied SEO best practices and performance optimizations, improving search visibility and page load times.

TECHNICAL SKILLS

- Core:** TypeScript, JavaScript (ES2023+), HTML, CSS, SQL, PHP, Python
- Frontend:** React, Next.js (App Router, Server Components, Server Actions, SSG/ISR), Astro, Angular
- State & Data:** Zustand, Redux Toolkit, React Query, React Hook Form, Zod, REST APIs
- UI & Styling:** Tailwind CSS, shadcn/ui, Styled Components, CSS Modules, Sass, Framer Motion, Storybook, responsive and accessible UI
- Testing & Delivery:** Vitest, Git, Gitlab Actions, Vercel, Netlify, Figma
- Backend:** Node.js, Laravel / PHP, MySQL, PostgreSQL, Prisma, Firebase
- Also:** Angular (RxJS, NgRx, Signals)

EDUCATION & LANGUAGES

B.Sc. in Computer Science, Higher Technological Institute (HTI), Egypt

2015 – 2019

Languages: Arabic (native), English (professional working, B2), German (A2)
